

EE 492 WEEKLY REPORT 2

Date:8/29/2016 - 9/5/2016

Group: **DEC1605**

Project title: **Kepros Physical Therapy & Performance, PC**

Client: Ted Kepros

General Advisor: Suresh Kothari

Technical Advisor: Jeremias Saucedo

Team Members/Roles:

Anthony Branson: Team Leader

Jiahui Quan : Team Webmaster

Samuel Eue : Key Concept Holder

Benjamin Engh : Team Communication Leader

Weekly Summary

Meet with instructor George, talking about the process of the project and problems we are facing. Set up a meeting with technical advisor, client and Carey. We try to communicate with the board, reset the pins and some of the functions on the board and run the old codes to get some raw data.

Past week accomplishments

We got our hardware connected with computer and run some functions using the arduino. We also build a github group in order to editing codes together on the same page.

Individual contributions

<u>NAME</u>	<u>Individual Contributions</u>	<u>Hours</u>	<u>HOURS</u>
-------------	---------------------------------	--------------	--------------

		<u>this week</u>	<u>cumulative</u>
Ben	Software modification	2	57
Jiahui	Website maintenance Weekly reports Doing algorithm	4	52
Anthony	Meeting coordination and client/advisor communication	2	48
Samuel	Software/hardware modification	2	44

Plan for coming week

- Meet with technical advisor and clients about the project update and problems we are struggling with.
- Trying to reset the pins and some of the functions on the board and run the old codes to get some raw data.
- Getting some updated of codes
- Have a general idea of the algorithm we used for our device.
- Trying to write more details in the design documents and final reports

Weekly advisor meeting status

We will have our first meeting next week.
