Weekly Summary

This week, we are going to figure out how to get the second bus working properly. We found a datasheet to set up a second bus using pin 11 and 13, while the first bus is using SCL and SDA pin. But for some reason, it is not working properly.

Pending issues

We set up the second bus, but it is not working.

Plans to solve issues

- Try different pin names to see if it is working or not.
- Check if the printf function is working or not
- Try different pins to see if the problem occurs because of the availability of pins
